

Before

The front yard featured scattered stepping stones, stacked stone beds, and rock accents—but no grass and little cohesion in the overall design.

After

Saying Goodbye

TO AN OUTDATED YARD

Sometimes change is hard, but not always. When these Medford Lakes homeowners reached out to Landvisions, they knew their front yard needed help but weren't sure where to start. "Our curb appeal was really slacking, and the flagstone stacks were becoming dangerous," the homeowner shared. With a plan to stay in their home long-term, they felt ready to invest in a fix. Trusting Landvisions with the design and installation, they requested a clean look, safer walkways, and easy maintenance.

A fresh green lawn, thoughtfully placed accent trees and shrubbery, and a stone path to the front door give this yard a clean, welcoming feel with lasting curb appeal.

The standout feature is the illuminated stone walkway, which restyled the front entry's appearance and usability. "It was so much more work than we realized, and we loved watching the team's workmanship day after day," the homeowner said. The addition of a half-court for shooting hoops is already a hit with their two young sons. We're excited that friends will be here all summer long!"

Landvisions improved the yard's aesthetics and functionality with natural materials, low-maintenance solutions, and deer-resistant plantings that will thrive in Medford Lakes. They removed a few trees to increase sunlight for the new lawn and added a small irrigation system. High-quality materials from Wicki Stone, Alari's Sod Farm, Site One, and Wharton Landscape Supply ensured durability and a polished finish.
